the rule of law is indispensable for sustained peace good governance and economic growth especially in countries recovering from civil war yet despite its importance we know surprisingly little about how to restore the rule of law in the wake of conflict in this book robert a blair proposes a new theory to explain how the international community can help establish the rule of law in the world's weakest and most war torn states focusing on the crucial but often underappreciated role of the united nations

blair tests the theory by drawing on original household surveys in liberia highly disaggregated data on un personnel and activities across africa and hundreds of interviews with un officials local leaders citizens and government and civil society representatives the book demonstrates that un intervention can have a deeper more lasting and more positive effect on the rule of law than skeptics typically believe

the rule of law is frequently invoked in political debate yet rarely defined with any precision some employ it as a synonym for democracy others for the subordination of the legislature to a written constitution and its judicial guardians it has been seen as obedience to the duly recognised government a form of governing through formal and general rule like laws and the rule of principle given this diversity of view it is perhaps unsurprising that certain scholars have regarded the concept as no more than a self congratulatory rhetorical device this collection of eighteen key essays from jurists political theorists and public law political scientists aims to explore the role law plays in the political system the introduction evaluates their arguments the first eleven essays identify the standard features associated with the rule of law these are held to derive less from any characteristics of law per se than from a style of legislating and judging that gives equal consideration to all citizens the next seven essays then explore how different ways of separating and dispersing power contribute to this democratic style of rule by forcing politicians and judges alike to treat people as equals and regard none as above the law
